Health Through Water

‘Sanitas Per Aqua’ are the words behind the acronym SPA, which means in Latin ‘health through water’. It was the Romans who were the first to use water for wellness and relaxation.

Today the spa is known for its many benefits on our well-being: the combination of heat and massage relax the mind and body, improving health.

Sport & water

When anything is immersed in a liquid it seems lighter, because the liquid pushes it up and cancels some of its weight. this is the famous ‘Archimedes’ principle’.

In fact: you feel lighter in the water! The effects of immersion in water decrease 90% body weight, which reduces the pressure on articulations and muscles. The effect of water improves joint mobility and preserves articulation.

Health + Wellness

“The effect of water improves joint mobility and preserves articulation”

The Aqua Bike

The AQUA BIKE provides a 2 in 1 solution of a personal hot tub cabin with aqua biking exercise. The combination of the hydro massage and cycling create a more effortless form of exercise with incredible results. While you are pedalling and burning calories your body and muscles are relaxing so the tension and pressure is less but the results are amazing with a 45 minute session burning over 800 calories.

Moreover this product offers the facility an excellent revenue earning opportunity with complete return on investment achieved easily within the first 6 months of ownership and high profitability beyond this.

The AQUA BIKE concept is already established and very popular in France, Italy and other European Countries as well as the UAE and United States.

Unique concept

The Benefits

Weight (when empty): approx
150KG

Water Capacity: 375 L

Turbo Air Massage Jets:
17 rotary and directional

Filling Time: 7 minutes

Drain Time: 3 minutes

Jet Pump: 1.5 cv

Heater: 1.5kw

Blower: 400w

Air jet blowers: 10

LED Lighting system

Speakers and bluetooth

The Aqua Bike

"When the 40 minutes are up, I'm exhausted. My face is bright red, I've worked up a serious sweat, and my legs are like jelly. But I also feel invigorated, every part of my body is alive, and I feel on top of the world."
