

HERITAGE SPAS

SUMMER 2019

Luxury Relaxation in a Heritage Spa

In Southern California in the early 1970s, a handful of pioneers built the world's first hot tubs. Our Heritage range pays homage to those early start ups who manufactured spas made from modified wood barrels.

Thank goodness for the technical advances since then. Our Heritage range features wood-effect synthetic cabinets instead of the endangered redwood previously used and state of the art electronics instead of air valves.

Built to last

With a generous eight year limited warranty and with fantastic after-sales care, Heritage Spas are beautifully crafted and built to offer many years of enjoyment and well being.

Soothing Hydrotherapy Jets

Aiding relaxation and creating well-being

The Hydrotherapy jets in a Heritage Spa are perfectly positioned and designed to offer a smooth, intense and relaxing massage where you need it most. Whether they are positioned for your neck and shoulders, your lower back or your feet, they will soothe aches and pains and help you to relax.

Our Jets can be turned on or off by turning the jet face, allowing you to customise your spa experience. You can also adjust the power of each jet with the bar top controls; increase the water and air power to make the massage firmer, lower the control to create a more gentle massage.

To soothe tired, aching muscles, many of the massage jets in a Heritage Spa rotate and pulse; position yourself in the spa so that the jets can target the area of your body where they are needed most. For sore feet, many seating positions feature jets to deliver the ultimate foot and leg massage.

The optional Hand Held Massage Jet allows you to massage your legs and upper body or anywhere that's difficult to get to with a conventional hydrotherapy jet.

Heritage Features

Lucite™ Shell The shell of a Heritage Spa is crafted in industry leading Lucite™ acrylic which allows it to be molded around tight edges and soft curves without a blemish.

Cabinet The UV resistant, wood-effect cabinet is constructed from individual slats. Panel fixings are kept to a minimum to add to the cabinet's sleek charm.

Electronics With the most up-to-date control system manufactured by the Canadian company Gecko, all spas are fitted with a reversible, back-lit key pad, waterproof control box and an efficient 3kw heater that keeps the spa water hot but running costs low.

Pillows Our comfortable pillows are made from long lasting ozone and chlorine resistant EVA material.

Fontaine de Vie™ Relax and enjoy the sight and sounds of the built-in waterfall.

Lighting The in-spa LED lighting features multiple colour settings & colour sequencing. Use the key pad to select your favourite colours.

Courtesy Light For your safety at night Heritage Spas feature a low energy LED courtesy light.

HERITAGE SPAS LIMITED WARRANTY

8 Year Structural and 5 Year Surface Warranty

Riptide warrants the sub frame and structure not to crack or fracture for a period of eight years from delivery date. Additionally, the Lucite™ surface material of the Riptide Spa is warranted not to peel, crack, wrinkle, blister, yellow, efface or delaminate for a period of five years from the spa's delivery date. The Lucite™ surfaces are non-permeable and will not absorb odours, bacteria or pollutants.

1 Year Trim and Cover Warranty

Riptide warrants the cosmetic trim and spa cover to be free from defects in materials and workmanship for a period of one year from the spa's delivery date.

3 Year Gecko Hi Flow 3kw Heater Warranty

Riptide warrants the Gecko Hi Flow 3kw heater against fault in manufacture or faulty workmanship for a period of three years from its delivery date.

2 Year LED Light Warranty

Riptide warrants the LED lighting chains and bulbs to be free from defects of materials and workmanship for two years.

3 Year No Leak Warranty

Riptide warrants your Heritage Spa not to leak for a period of three years from its delivery date. This warranty specifically covers leaks from the wall fittings, jet fittings, internal plumbing, internal glue joints, freeze drains and all bonded parts including the filter chamber and light fittings.

3 Year UV Resistant Low Maintenance Cabinet Warranty

Riptide warrants the UV resistant synthetic wood cabinet material not to peel, crack, wrinkle, blister or delaminate and to be free from defects in workmanship for a period of three years from the spa's delivery date. This warranty specifically covers the cabinet's structural integrity, including all glue and integral bonded joints.

3 Year Component Warranty

Riptide warrants the electrical components, pumps, control box and other spa components against malfunction or defects in workmanship for three years from its delivery date. Filter cartridges, spa pillows and cover locks are not included in this warranty, but are warranted to be free from defects in materials or workmanship at the time of delivery to the original consumer purchaser.

1 Year Ozone Generator Warranty

The ozone generator has a warranty for one year, or 8,000 operating hours, whichever comes first.

No-Nonsense Warranty

Riptide will make no call-out or labour charges or ask for part payment of parts for the entire warranty period, provided that your Heritage Spa has had an annual service within the last 12 months to validate the warranty.

Warranty subject to terms and conditions .

Therma Lock Triple Insulation System + ENERGY EFFICIENT ENGINEERING

The ultimate insulation system by Riptide

There are several types and methods of spa insulation, all with the aim of retaining the heat and moisture in the spa water and to keep the running costs ultra low. The Riptide Therma Lock triple insulation system delivers instant access to the warm water of your spa all year round, while only using a small amount of electricity to maintain the heat.

To deliver highly efficient insulation, during construction the spa surround and floor are initially assembled without the spa shell. High density foam is then spray-applied onto the spa shell. Next, the cabinet and floor are lined with insulating, reflective material, then the spa shell is lowered and fitted into the cabinet. The two parts create a perfect fit thus eliminating any gaps and energy loss.

Heat and moisture-proof cover

The spa cover is another important barrier against any potential heat loss. The fully tailored marine grade vinyl cover on Riptide Spas has maximum insulation to help maintain the water temperature.

The cover's 100mm polystyrene core is covered in heat reflecting, shrink-wrap aluminium foil. The foil layer also keeps any water out of the polystyrene, preventing the core from getting heavy with moisture through damage by ozone and chlorine which are ever present in the spa water.

Marine Grade Vinyl Encasement

Thick Polystyrene Core

Shrink Wrap Aluminium Foil

For security, child proof locking straps are fitted, plus built-in handles, a wind skirt and additional hinge insulation (often a weak spot of many other spa cover designs) all come as standard.

Low energy, silent circulation pump and filtration system

Heritage spas come complete with a low energy, silent circulation pump, an easy to clean in-spa filtration system plus anti-bacterial ioniser and a corona discharge ozone system with an inline mixer to ensure pure, clean water every time you take a dip.

Energy efficient engineering

The pumps and heater produce heat as a by-product of their operation. Heritage Spas retain this heat inside the cabinet space, aiding heat retention in the spa water.

Easy to access components

Traditionally designed spas have the pumps, control boxes and heaters positioned around all four sides of the spa. If placed in a corner, against a hedge or up against a wall and an engineer needs to get inside, these spas have to be drained, moved, repaired, pushed back and refilled, wasting valuable time and money.

This is not the case with Heritage Spas. All the components are positioned on the same side as the compartment door. In the event that an engineer needs to get inside your spa, all that is needed is to pull away the steps and open the cabinet!

LEGACY 3 PERSON

Beautiful and compact with big features

The Legacy is designed to fit in those smaller, compact spaces yet still comfortably has room for three bathers.

A fully featured spa with 29 jets and a full length lounger, plus water edge lighting and the Fontaine de Vie™ waterfall feature. The Legacy will give you years of pleasure.

MORE THAN A HOT TUB

The benefits to your health and well-being

Promotes weight loss

In clinical studies patients who use hot tubs lost an average of 3.5 pounds in weight without any new diet or physical exercise programmes.

In short, the weight loss resulted from the hot water massage simulating the effects of exercise, on the muscles.

Stress relief

Stress results in muscle tension, headaches, fatigue and soreness. Regular hot tub use, through a combination of buoyancy, heat and massage relieves tension and stress.

Buoyancy eases pressure in joints and muscles, while heat increases blood flow to muscles and accelerates healing. Additionally, hot tub jets provide therapeutic massage, stimulating the release of endorphins, which are the body's natural painkiller.

Lower diabetic blood sugar levels

A study by the New England Journal of Medicine found that bathing in a hot tub simulates the beneficial effects of exercise.

The result is that patients with type 2 diabetes who soak in a hot tub for 30 minutes a day, 6 days a week for 3 weeks, experience a reduction in blood sugar levels by an average of 13%.

Be together

Spend time together, immersed in warm water. The spa becomes a private and safe place where people can relax, let their guard down, and enjoy meaningful conversation and special moments with loved ones.

Be outside

Take a pause and appreciate beautiful sunsets, starry nights, falling snow, changing leaves, and much more. With a hot tub, you have a private retreat steps away from your door. Surrounded by nature, you can take in the beauty we often take for granted.

Be yourself

Be at your best every day by making a spa a part of your daily ritual. Experience relief of stress and tension from sore muscles and emotional and mental benefits. Immersed in warm water, you can disconnect and emerge renewed.

Minimise the pain of arthritis

For people with arthritis, the Arthritis Research Campaign recommends using a hot tub as an excellent way to apply heat to arthritic joints.

Benefits of a soak in a hot tub can include muscle relaxation, decreased pain and joint stiffness and greater ease when performing exercise and daily activities.

Sleep more soundly

No more counting sheep! According to the National Sleep Foundation, 30 million Britons suffer from mild to chronic insomnia and other sleep disorders.

A study in the journal 'Sleep' showed that soaking in a hot tub prior to bedtime will not only help you fall asleep, but will provide a deeper, more relaxing sleep as the body cools.

Lowers blood pressure

A recent study for the Mayo Clinic recommended that relaxing in a hot tub can be beneficial for heart disease patients. The study showed that relaxing in a hot tub is less stressful on the heart and more beneficial than working out on an exercise bike! The study also demonstrated that soaking in the hot tub for as little as 15 minutes will lower blood pressure.
