Foldaway Automatic Cover Lifter Features

OPTIONAL

Incorporating strong and lightweight Kevlar in its construction, the Foldaway automatic lifter removes the hassle of lifting the cover by hand every time you wish to use your spa.

Activated by the remote control, the automatic Foldaway system moves the cover out of sight, providing a 360° panoramic view.

Made of ultra light carbon fibre, the lift mechanism operates

quietly and is maintenance free. With very low energy consumption and intelligent features, the Foldaway cover lifter makes your Starlight Spa experience even better!

When you exit your Starlight Spa you also have the option of opening and closing the cover with the detachable, magnetically coded Smart Key, which also protects the system against unauthorized use. Turn the illuminated

button and the spa cover closes automatically.

For total peace of mind, the Foldaway has a child-safe automatic stop feature. If there is any obstruction when in operation, the cover lifter system will fully open within seconds and move the cover into it's hidden parking position. Built to the highest standard, the Foldaway system offers the ultimate spa experience.

MORE THAN A HOT TUB

The benefits to your health and well-being

Promotes weight loss

In clinical studies patients who use hot tubs lost an average of 3.5 pounds in weight without any new diet or physical exercise programmes.

In short, the weight loss resulted from the hot water massage simulating the effects of exercise, on the muscles.

Stress relief

Stress results in muscle tension, headaches, fatigue and soreness. Regular Hot Tub use, through a combination of buoyancy, heat and massage relieves tension and stress.

Buoyancy eases pressure in joints and muscles, while heat increases blood flow to muscles and accelerates healing. Additionally, Hot tub jets provide therapeutic massage, stimulating the release of endorphins, which are the body's natural painkiller.

Lower diabetic blood sugar levels

A study by the New England Journal of Medicine found that bathing in a hot tub simulates the beneficial effects of exercise.

The result is that patients with type 2 diabetes who soak in a hot tub for 30 minutes a day, 6 days a week for 3 weeks, experience a reduction in blood sugar levels by an average of 13%.

Be together

Spend time together, immersed in warm water. The spa becomes a private and safe place where people can relax, let their guard down, and enjoy meaningful conversation and special moments with loved ones.

Be outside

Take a pause and appreciate beautiful sunsets, starry nights, falling snow, changing leaves, and much more. With a hot tub, you have a private retreat steps away from your door. Surrounded by nature, you can take in the beauty we often take for granted.

Be yourself

Be at your best every day by making a spa a part of your daily ritual. Experience relief of stress and tension from sore muscles and emotional and mental benefits. Immersed in warm water, you can disconnect and emerge renewed.

Minimise the pain of arthritis

For people with arthritis, the Arthritis Research Campaign recommends using a hot tub as an excellent way to apply heat to arthritic joints.

Benefits of a soak in a hot tub can include muscle relaxation, decreased pain and joint stiffness and greater ease when performing exercise and daily activities.

Sleep more soundly

No more counting sheep! According to the National Sleep Foundation, 30 million Britons suffer from mild to chronic insomnia and other sleep disorders.

A study in the journal 'Sleep' showed that soaking in a hot tub prior to bedtime will not only help you fall asleep, but will provide a deeper, more relaxing sleep as the body cools.

Lowers blood pressure

A recent study for the Mayo Clinic recommended that relaxing in a hot tub can be beneficial for heart disease patients. The study showed that relaxing in a hot tub is less stressful on the heart and more beneficial than working out on an exercise bike!

The study also demonstrated that soaking in the hot tub for as little as 15 minutes will lower blood pressure.
